

SELECTBIO

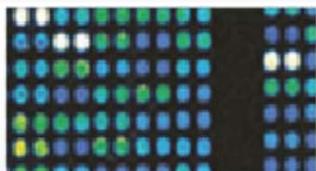

SD2014 Mega-Event

18-19 September 2014 San Diego, California

Point-of-Care Diagnostics WORLD CONGRESS

- Latest Technologies for POC Diagnostics
- Companion Diagnostics
- Emerging Classes of Biomarkers for POC
- POC for Infectious Diseases and Cardiovascular Disease
- Oncology Biomarkers
- Emerging Companies and Products

MICROARRAY WORLD CONGRESS

- Advances in DNA Arrays
- Advances in Lipid and Tissue Arrays
- Advances in Protein and Antibody Arrays
- Bioinformatics for Microarrays
- Biomarker Validation
- Emerging Technologies
- Molecular Diagnostics

LAB-ON-A-CHIP world congress

- Diagnostics and Medical Applications
- Droplet-based Microfluidics
- Biological Analysis
- Organs-on-Chips
- Optofluidics & Detection
- Development in Materials & Microfabrication
- Microfluidic Device Manufacturing
- Biosensors

Massive Tracks
Loaded with Top-Tier
Speakers

Exosomes and Single Cell Analysis (SCA) Summit

- Label-Free Routes to Single Cell Analysis
- Microfluidics & Chips in Single Cell Analysis
- Novel Tools and Technologies for Single Cell Analysis
- Single Cell Genomics, Transcriptomics & Proteomics
- CTCs and Exosomes as Circulating Biomarkers
- Protein and RNA Cargo in Exosomes and Methods of Analysis
- Methodologies for CTC Capture and Analysis
- Intersection of Microfluidics and Single Cell Analysis: Technologies & Applications
