

# Clinical Translation of **STEMCELLS**

21 - 22 April 2014 • Palm Desert, CA, USA

SELECTBIO

SELECTBIO is hosting its 2nd Annual Clinical Translation of Stem Cells in Palm Springs, California, USA.

This conference brings together basic scientists and clinicians focusing on the utilization of stem cells for therapeutic applications. Clinicians-surgeons who have been utilizing adipose-derived stem cells for repair as well as cosmetic purposes describe their methodology, challenges for utilization, and results obtained thus far. In this manner, we seek to describe the trajectory for clinical deployment of this stem cell class.

## Agenda Topics

- Adipose-derived Stem Cells
- Clinical Perspectives
  - Cosmetic Surgery and Associated Applications
- Clinical Utility
- Disease Classes Addressed and Current Status of Ongoing Clinical Trials
- iPSCs: Clinical Translation Trajectory and Associated Challenges and Opportunities
- Regulatory Landscape and Ethical Considerations
- Translational Research Activities with Adult Stem Cells
  - Dental Applications
  - Orthopaedic Applications
  - Tracking Cells in vivo
- Umbilical Cord Blood-derived Stem Cells
- Veterinary Applications of Stem Cells
